Software Engineer building **AI-powered products and backend systems** from **0 to 1** using LLMs, AI agents, and RAG. Experienced in turning business requirements into **production-ready software** and working directly with clients to deliver impactful solutions.

## Skills

- **AI & LLM:** AI Agents, Agentic Workflows, RAG, Embeddings, Semantic Search, FAISS, LangChain, Prompt Engineering, Function Calling, OpenAI, Anthropic, Gemini, DeepSeek
- **Backend & Cloud:** Python, FastAPI, Flask, Django, REST APIs, Pydantic, Firebase, Firebase Auth, Firestore, Redis, MongoDB, SQL, AWS, Webhooks
- **Frontend:** React.js, TypeScript, JavaScript, Tailwind CSS, Redux Toolkit, Zustand
- **Testing & Tools:** Postman, JIRA, Git

## Experience

**Software Engineer | Orchestrax Technologies Pvt. Ltd.** (6 months Intern to Full-time) Jan 2025 – Present

*Pratinidhi AI - AI Agent and CRM Workflow Platform* (Full Stack Engineer)

- Built and shipped **AI-powered CRM and customer engagement automation** using **Python/Flask, React, Firebase and LLM APIs**, enabling automated interactions across **5 communication channels**: WhatsApp, Telegram, Email, Instagram and voice.
- Owned **end-to-end product delivery**, translating business requirements into production-ready frontend and backend features in close collaboration with the founding team.
- Engineered configurable **AI agent workflows** with LLM-based intent handling and **function calling**, managing conversation state, lead stages, transitions, follow-ups and escalation rules for CRM actions.
- Established **RAG-based responses** using **embeddings and semantic search** with configurable knowledge sources, supplying relevant customer and domain context to AI agent replies.
- Partnered with Physics Wallah stakeholders to build CRM campaign features aligned to sales-team workflows, supporting campaigns with **317K+ leads** and driving platform adoption.
- Designed **webhook-driven integrations** across communication channels, enabling async message processing, duplicate prevention, and automated follow-ups for reliable engagement workflows.
- Built **React.js** frontend components using **TypeScript and Tailwind CSS** for CRM analytics dashboards, visualizing key metrics such as lead conversion, campaign performance and customer engagement to support sales-team decision making.

*Educado AI - AI Learning Platform (NISM and SAT)* (Primary Backend Engineer)

- Led backend development, delivering **60+ REST API endpoints** for AI tutoring, assessments, payments, learner progress, and analytics using **Python, FastAPI, Firebase Auth, Firestore, Redis, and AWS**.
- Developed an **LLM-powered AI Tutor** using **RAG, document chunking, FAISS, LangChain, and OpenAI**, to retrieve relevant exam content and deliver contextual learning support.
- Designed **Razorpay payment and subscription workflows** covering verification, coupons, activation, and payment history for monthly and yearly plans in both INR and USD.
- Built **Redis-backed learner sessions** and APIs for progress, task assignment, analytics and recommendations. Added backend monitoring for **response time, P95/P99 latency and 4xx/5xx errors** to track API performance and reliability.

**Quality Assurance Intern | 360Logica Testing Services (SAKSOFT)** June 2024 – Aug 2024

- Evaluated web applications and AI-driven products through **exploratory, functional, and API testing**, identifying defects across multiple release cycles.
- Managed defect triage and validation using JIRA, TestRail, and Postman, collaborating with engineering teams to reproduce issues and confirm fixes.
- Assessed **LLM application behavior** by testing chatbot responses across diverse prompt scenarios, evaluating relevance, correctness, consistency, and edge-case handling.

## Education

**Thapar Institute of Engineering and Technology, Patiala** 2021 – 2025

B.E. in Computer Engineering, CGPA: 7.63

**S.D. Public School** 2020 – 2021

Intermediate, Percentage: 92.8%

## Certifications & Contributions

- **Math Expert, Photomath:** Guided **100+ students** through mathematical problem-solving and concept clarification, strengthening technical communication and learner support. [\[Certificate\]](#)
- Earned **Anthropic Claude 101, Anthropic AI Fluency, Scaler ReactJS, and Scaler JavaScript** certifications focused on AI systems and software engineering. [\[Certificates\]](#)
- Conducted AI awareness sessions for Pratinidhi AI cohorts, helping non-technical participants adopt LLMs, AI assistants, and workflow automation tools.
- Volunteer Engineer: developed a technology solution for a nonprofit organization.
